SUBJ: Expanded Ecological Studies Work Plan for OU2 at the
Olin Corp./McIntosh Plant

Dear Mr. Brown:

This letter hereby approves the Work Plan for additional sampling efforts at the Olin/McIntosh Superfund Site. In addition, EPA reviewed the selected reference location and finds it acceptable for the intended purpose.

There are additional concerns that will have to be addressed regarding the model and sampling size for crayfish (as discussed on 06/16/94). However, these issues do not preclude initiation of sampling efforts scheduled for June 20, 1994. These additional concerns will be provided under separate cover.

Sincerely,

Cheryl D. Walker Smith, RPM
South Superfund Remedial Branch
